

STATE OF DELAWARE PUBLIC SERVICE COMMISSION

APPLICATION FOR AN ELECTRIC SUPPLIER CERTIFICATE

26 Del. Admin. C. §3001 – Rules for Certification and Regulation of Electric Suppliers

2.0 Certification of Electric Suppliers

2.1 All Electric Suppliers must obtain an Electric Supplier Certificate from the Commission to sell electric supply service to or arrange the purchase on behalf of Retail Electric Customers prior to offering contracts to Customers or commencing service.

2.1.1 Certification Requirement. All Electric Suppliers shall file with the Commission an original and ten (10) copies of an Application for an Electric Supplier Certificate. Such application shall contain all the information and exhibits hereinafter required and may contain such additional information as the Applicant deems appropriate to demonstrate to the Commission that it possesses the technical, financial, managerial and operational ability to adequately serve the public.

2.3 Application Fee.

A non-refundable application fee of \$750 shall be submitted with the application for Certification.

2.4 Incomplete or Abandoned Applications.

Applications that do not include the necessary fees, supporting documentation or information may be rejected. The Commission Staff will provide the Applicant with a list of deficiencies and the Applicant will be given time to provide the necessary information to complete its certification. However, an incomplete or abandoned application will be closed four (4) months after the filing date, unless such time frame is extended by the Commission.

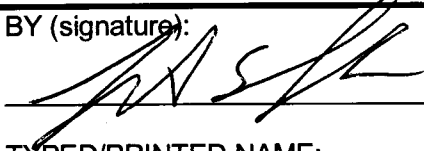

10.0 Other General Rules

10.1 Proprietary Information. Under Delaware's Freedom of Information Act, 29 Del. C. ch. 100, all information filed with the Commission is considered of public record unless it contains "trade secrets and commercial or financial information obtained from a person which is of a privileged or confidential nature." 29 Del. C. §10002(d)(2). To qualify as a non-public record under this exemption, materials received by the Commission must be clearly and conspicuously marked on the title page and on every page containing the sensitive information as "proprietary" or "confidential" or words of similar effect. The Commission shall presumptively deem all information so designated to be exempt from public record status. However, upon receipt of a request for access to information designated proprietary or confidential, the Commission may review the appropriateness of such designation and may determine to release the information requested. Prior to such release, the Commission shall provide the entity which submitted the information with reasonable notice and an opportunity to show why the information should not be released.

REFER TO 26 Del. Admin. C. § 3001 FOR SPECIFIC INFORMATION REQUIRED. UNLESS OTHERWISE NOTED, CAPITALIZED TERMS SHALL HAVE THE MEANINGS ASCRIBED TO THEM IN 26 Del. C. §1001 and 26 Del. Admin. C. §3001. COMMISSION STAFF MAY REQUEST ADDITIONAL INFORMATION IN ORDER TO COMPLETE THE PROCESSING OF YOUR APPLICATION.

INFORMATION REQUIRED FROM ALL APPLICANTS		
1	Authority to Do Business in Delaware: [Section 2.1.1.1]	Required information is provided in Exhibit <u>1</u> .
2	Resident Agent: [Section 2.1.1.2]	<u>Robb Tricomi</u> : <u>1063 Lower Twin Lane Rd.</u> <u>New Castle, DE 19720</u>
3	Performance Bonds: [Section 2.1.1.3]	() Required information is provided in Exhibit ____. (<input checked="" type="checkbox"/>) Performance bond or guarantee not required.

9	Waiver of Certification Requirements. [Section 2.5] (Only applicable to Applicants requesting a waiver)	() Applicant requests waiver of the requirements in Section(s) ____ for the following reason(s):
10	Tax identification number	

ADDITIONAL INFORMATION NOT REQUIRED FROM BROKERS

1	All new Applicants, except Brokers , shall demonstrate in their applications that they possess a minimum of \$100,000 of assets in excess of encumbrances or a minimum of \$100,000 in cash, cash equivalents, or financial instruments that are reasonably liquid and readily available to meet their costs of providing electricity to Customers or any combination thereof. [Section 2.1.1.5.8]	() Cash or cash equivalent {2.1.1.5.9.1} () Certificate of deposit {2.1.1.5.9.2} () Stock proceeds or stockholder equity {2.1.1.5.9.3} () Letter of credit {2.1.1.5.9.4} () Line of credit {2.1.1.5.9.5} () Loan {2.1.1.5.9.6} () Guarantee by corporation, co-partnership, or other person {2.1.1.5.9.7} () Guarantee by subsidiary, affiliate or corporation holding controlling interests {2.1.1.5.9.8} () Identifiable assets {2.1.1.5.9.9} Required information is provided in Exhibit(s) ____.
2	Each Applicant, except Brokers , shall publish notice of the filing of the application in two (2) newspapers having general circulation throughout the State in a form to be prescribed by the Commission. [Section 2.2]	The form of notice will be forwarded to the Applicant upon receipt of the Application for an Electric Supplier Certificate.

ADDITIONAL INFORMATION REQUIRED FROM APPLICANTS SERVING RESIDENTIAL AND SMALL COMMERCIAL CUSTOMERS

<p>Contracts. At the time of the filing, the Applicant shall either provide its Standard Contract for Residential and Small Commercial Customer or a link to it on the Applicant's website. Such contract is subject to review by the Commission Staff and if Staff determines that such contract is not consistent with these Rules for Certification and Regulation of Electric Suppliers ("Rules"), then Staff shall have the authority to require changes in order to make consistent with these Rules or Electric Supplier faces revocation of its Electric Supplier Certificate by the Commission after a hearing. Such contract shall be in clear and plain language and include explicit terms and conditions which at a minimum contain the following <i>[Section 2.1.1.9]</i></p>	<p>Required information is provided in Exhibit(s) ____.</p> <p><i>None - broker only applicant</i></p>
<p>1</p>	<p>A clear statement of the duration of the contract. <i>[Section 2.1.1.9.1]</i></p>
<p>2</p>	<p>The price stated in cents per kWh or a clear and unambiguous statement of the precise mechanism or formula by which the price will be determined. <i>[Section 2.1.1.9.2]</i></p>
<p>3</p>	<p>A complete list of any other fees, including early termination penalties, late fees, and interest charges, which can be imposed on the customer, including but not limited to the magnitude of the fees and the specific conditions under which such fees can be imposed. <i>[Section 2.1.1.9.3]</i></p>
<p>4</p>	<p>A statement of the Electric Supplier's termination rights, which shall explain the specific conditions, under which the Electric Supplier may terminate service. At a minimum, the Electric Supplier shall provide the Residential or Small Commercial Customer with at least 30 days notice of termination of the contract and procedures to maintain ongoing service. <i>[Section 2.1.1.9.4]</i></p>
<p>5</p>	<p>The Electric Supplier's local or toll-free telephone number; address and web address, if applicable; and the Commission's address and telephone number. <i>[Section 2.1.1.9.5]</i></p>
<p>6</p>	<p>A statement informing the Residential or Small Commercial Customer that, because of relocation outside of their current EDC's service territory, they he/she may terminate his/her contract with his/her Electric Supplier with no termination fee upon a 30-day notice in writing to the Electric Supplier. <i>[Section 2.1.1.9.6]</i></p>
<p>7</p>	<p>A Residential or Small Commercial Customer has ten (10) calendar days from the day the EDC sends the confirmation letter to rescind his/her selection. <i>[Section 3.4]</i></p>

Technical and Managerial Competency

Amerigreen Energy has been a supplier of electric and natural gas since 2011. Previous to that the owners and executive management operated a successful electric supply company, Worley & Obetz, Inc., that began sales in 1998.

AMERigreen Energy's electricity and natural gas team is led by Jon Loercher and Seth Obetz. Both individuals have been involved with these industries since the beginning of deregulation in the late 90's. They gained their experience by operating Advanced Energy, a successful supplier in Pennsylvania until rate caps inflated the wholesale market and made it impossible to continue operations. When rate caps came off in PA in 2010, Jon and Seth applied and received licenses to sell electric and natural gas in PA, NJ and NY. With the winter vortex of 2014 taking its toll on customers and causing margin erosion in most electric markets, an executive decision was made to begin brokering electricity and natural gas. This would allow Amerigreen Energy to use our extensive experience to educate customers and build long term relationships. We interact with suppliers—with whom we have had relationships with for over 15 years—on our customers' behalf, with little to no risk involved.

Effectively managing our customers' information is of key importance. We have software in place that will track customer's usage along with our relationships with suppliers. We have a website built with the ability to enroll customers and communicate with them via email or mail throughout their contract term.

We are currently licensed and operating as a broker for electric and natural gas in PA, NJ, NY and CT. Attached to this application are licenses for NJ and PA.

We intend to broker to commercial customers via salesforce that has relationships with customer in Delaware. We intend to broker to residential customers through business relationships, SEO and SEM. Residential will not be our focus and at no point will we participate in door to door or cold calling to this class of customer.

AMERIGreen.
Energy Brokers

Navigating the complex energy market

We can help you find the
electricity and natural gas supplier
and price that's right for you.

www.amerigreenenergybrokers.com

Product you can rely on. People you can trust.

AMERIGreen Energy Brokers seeks to help our clients understand and navigate the increasingly complex competitive energy markets and assist with energy procurement; our primary focus

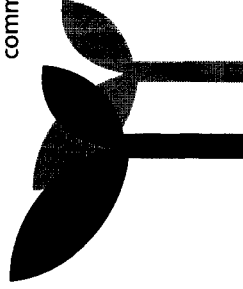

We can help you find the supplier, product and price that's right for you.

For many individuals and businesses, the cost of energy is a significant expense, and the time commitment required to research, compare, and negotiate supplier offers can be overly burdensome in today's ultra-competitive business environment. We can handle these duties for you so you can focus on your core competencies.

AMERIGreen Energy is a Lancaster, Pa.-based wholesale energy provider to the Mid-Atlantic and New England regions dedicated to working every day to improve America's energy freedom and sustainability for today and future generations.

Since its founding, AMERIGreen Energy has provided innovative and domestically produced energy; supplying electricity, natural gas, petroleum and biofuels, propane, motor oils, risk management, and marketing solutions. AMERIGreen's partners enjoy unprecedented access to a trusted, total energy provider.

Our strong team of leading industry experts take pride in being recognized as a trusted, long-term partner customers have always counted on for guaranteed quality. Our commitment is to deliver the exceptional personal service you deserve.

Choose AMERIGreen Energy Brokers

Dependability - We understand that trust is earned through dependability, not through slick marketing schemes, and we treat every job as an opportunity to prove ourselves and earn your trust.

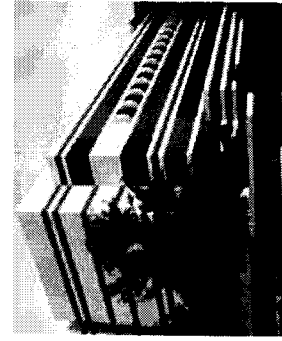

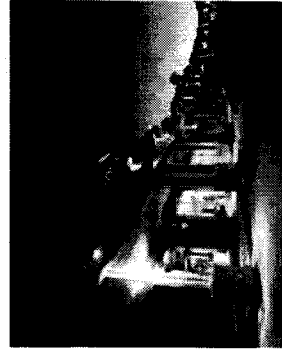

Experience - Our employees have many years of experience working for retail electric and natural gas supply companies and utilities; we leverage this experience to help you get the best deal for the energy products you require.

Relationships - We value long-term relationships, and seek to find you the best energy solutions for your long-term benefit.

Electric and Natural Gas Choice

Up until relatively recently, individuals and businesses did not have a choice on the company they purchased their electricity and natural gas from; the local utility company purchased the energy and delivered it to its customers. Now, in certain states, individuals and businesses have the option of choosing their electricity and natural gas suppliers, similar to the way individuals choose in which grocery store to do their shopping.

Let us handle the hassle so you can focus on your core business

AMERIGreen Energy

About Amerigreen

Vision

<http://www.amerigreen.com/Home/AboutAmerigreen.aspx>

With over six decades of experience in the petroleum industry, the founders of AMERIGreen's interest in alternative energy became clear during the oil embargo of the early 1970s. They realized they were not just oil suppliers, but energy suppliers. Their vision, resources, and strong industry affiliations helped pioneer their early efforts in establishing a strong, energy independent America.

Total commitment to customers is our highest priority.

Today, we have built a strong team of leading industry experts who take pride in being recognized as a trusted, long-term partner our customers have always counted on for guaranteed quality, procurement, and logistics concerns. With this, our commitment to you is to deliver the exceptional personal service you deserve. If you aren't satisfied, neither are we. That's a promise.

The AMERIGreen vision of Energy Independence.

America's dependence on oil is one of the most serious threats that our nation faces. It bankrolls dictators, pays for nuclear proliferation, and funds both sides of our struggle against terrorism. It puts the American people at the mercy of unstable gas prices, stifles our innovation and limits our ability to compete.

Realizing this, the vision of our founders has never been stronger than it is today. If there was ever a time when a major shift in the U.S. energy economy was possible, it is now. Decades of pioneering research and development by both government and industry, have yielded new technologies that turn abundant domestic energy sources-including biomass, into transportation fuels and heat.

We feel strongly, that as a nation, we have the ingenuity and determination necessary to create an energy secure America. We can discover and implement new ways of building America's use of domestic, non-polluting renewable energy that create jobs, improves our security, and strengthens the health of our Nation and our economy.

Mission

We work every day to improve America's energy freedom and sustainability for present and future generations. Providing domestically produced petroleum, biofuels, propane, lubricants, natural gas, and electricity through our growing network of committed AMERIGreen distributors.

Our success is dependent on the success of our distributors. Everything we do is aimed at helping our distributors succeed.

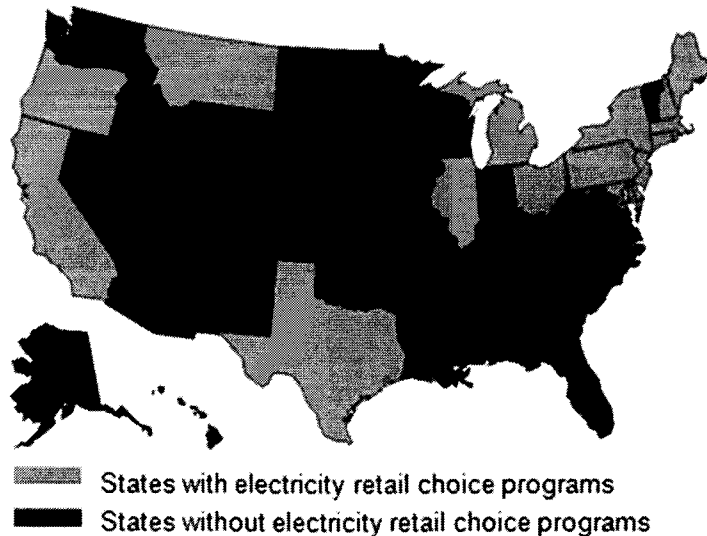

Electric & Gas Choice Overview

Basics

- Up until relatively recently, customers' local utility companies bought their energy and delivered that energy to their homes. However, now in many states, customers have the option to buy their energy from a company other than their local utility, called an Electric Generation Supplier (EGS), Electric Supply Company (ESCO), or Natural Gas Supplier (NGS) (collectively referred to herein as "choice supplier"). Regardless of whether a customer buys their power from the local utility company or a choice supplier, the local utility will still deliver that energy over its distribution system which it owns.
- Listed below are the states with retail electric choice programs:

Electricity retail choice states, 2010

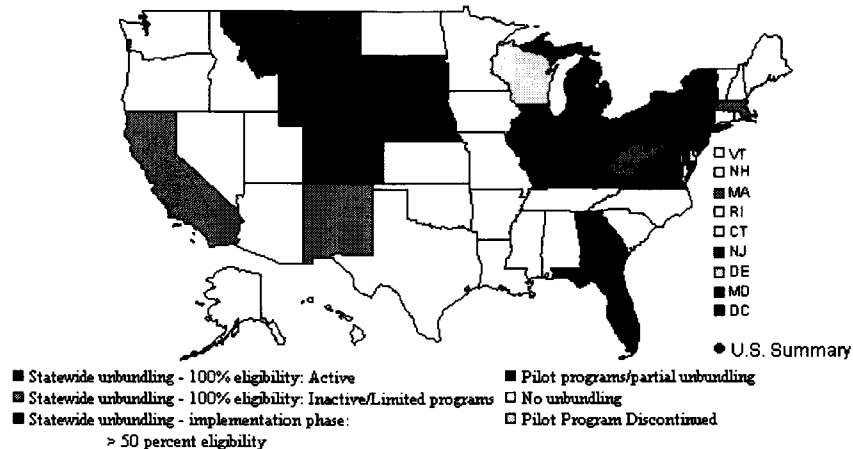

eia

- Listed below are the states with residential retail natural gas programs (only data available was for residential):

Status of Natural Gas Residential Choice Programs by State as of December 2009

(Click on a State or its abbreviation for more information about that State.)
See U.S. Summary for 2009 Highlights

Electric

- There are 3 main parts to an electric bill:
 - **Generation:** charge for the physical electricity itself
 - **Transmission:** charge for the movement of electricity from where it is generated to the point of distribution
 - **Distribution:** charge for the final delivery of electricity from the point of distribution to customers' homes and businesses; typically recovered through a combination of a customer charge and a distribution charge
- When a customer purchases power from an EGS (as opposed to the utility), the customer pays the EGS for the Generation and Transmission, and the local utility for the Distribution; if the customer purchases power from the utility (the default provider), the customer pays the utility for all three components
- Utilities by law can not earn a profit on the generation/transmission portion; they must sell the physical power itself at cost. Utilities use revenues from the distribution charge to maintain the distribution system and also earn a "just and reasonable" rate of return
- If a customer "drops" the supplier, the customer is placed back with the utility for electric power supply; the utility purchases power for all customers who do not select an alternative supplier, filling the role of the default supplier
- Customers choose EGS's and plans based on various factors
 - Price (\$ per kwh)
 - Price Type (Fixed, Variable, or Introductory Rate)
 - Term Length
 - Renewable Electricity
 - Cancellation Fees
 - Rewards

Gas

- There are 2 main parts to a natural gas bill:
 - **Natural Gas Supply:** the charge for the physical natural gas
 - **Distribution:** charge for the final delivery of natural gas from the point of distribution to customers' homes and businesses; typically recovered through a combination of a customer charge and a distribution charge
- When a customer purchases gas from an NGS (as opposed to the utility), the customer pays the NGS for the Gas Supply, and the local utility for the Distribution; if the customer purchases gas from the utility (the default provider), the customer pays the utility for both components
- Utilities by law can not earn a profit on the gas supply portion; they must sell the physical natural gas itself at cost. Utilities use revenues from the distribution charge to maintain the distribution system and also earn a "just and reasonable" rate of return
- If a customer "drops" the supplier, the customer is placed back with the utility for natural gas supply; the utility purchases natural gas for all customers who do not select an alternative supplier, filling the role of the default supplier
- Customers choose NGS's and plans based on various factors
 - Price (\$ per kwh)
 - Price Type (Fixed, Variable, or Introductory Rate)
 - Term Length
 - Carbon Offset Options
 - Cancellation Fees
 - Rewards

Operations in Delaware

Taxes: Electricity and natural gas are not taxed in Delaware.
